

Provider Development

Explore the Enjoin Advantage

Led by board-certified physicians with a strong academic background in evidence-based medicine and years of clinical practice, we understand each physician's time is valuable. Physicians want—and need—relevant and concise documentation guidance that doesn't detract from their face-to-face time with patients. That's why we encourage physician engagement using peer-to-peer, specialty-specific education methods. Our unique approach addresses today's quality-driven initiatives—uniting documentation and coding across the healthcare continuum to enhance data integrity—maximizing return on investment and long-term compliance.

Physician Advisor Program

A physician advisor (PA) is integral to the success of CDI efforts. As an extension of a CDI program, a strong PA will engage and foster physician involvement. More than just education, our training program is designed specifically to enhance the ability of PAs to effect change within their organizations.

- 40 hours of intensive classroom training performed by senior physician staff consultants
- Organized mentoring through record reviews with our physician team

Physician Documentation Training

Enjoin employs a multi-specialty group of physicians with extensive clinical backgrounds to work with your providers. Several levels of education are offered—with emphasis on how documentation and coding affects value-based payments, profiling, and performance including the various risk adjustment models.

- 1-hour departmental medical staff presentation increases level of awareness and impact of documentation and coding on physician profiles and reimbursement.
- 4-hour Hospitalist Seminar promotes documentation improvement to hospitalists who have a significant impact on inpatient coding.
- 4-hour Service Line Leader Seminar promotes liaisons between the documentation team and the respective specialty.

Care Team Education

Clinical support teams and other providers play an important role in capturing the complexity of the patient's condition and establishing chronic disease burdens. Enjoin uses a collaborative model where all key members of the care team learn the importance of documentation and coding.

Streamline your provider education to address all risk adjustment models. Contact Enjoin today for a comprehensive solution to advance clinical documentation integrity.

Provider Development

Why Enjoin?

Enjoin delivers a comprehensive solution for advancing clinical documentation integrity. With thirty years of direct physician leadership, our team ensures evidenced-based care is accurately reflected through precise documentation and coding for value-based reimbursement. Whether inpatient or ambulatory, the precision of healthcare data defines risk-adjusted, value-based outcomes through reliable documentation and coding.

Led by expert physicians with coding and documentation credentials, our clients achieve demonstrable improvements in CMI, coding accuracy, quality metrics, risk adjustment, and physician alignment—with an average return on investment of more than 700%.

The Enjoin Method

As clinical leaders, Enjoin’s board-certified physicians invoke strong partnerships with documentation teams, nurturing long-term success. Our approach empowers healthcare organizations to transform their clinical documentation practices using sustainable solutions. And our inclusive methodology unites documentation and coding for stronger quality and cost justification.

Evaluate: Identify vulnerabilities and opportunities for education through data analysis, record reviews and CDI process assessment.

Educate: Ensure long-term collaboration among the CDI team and providers with focused instruction across the continuum.

Enhance: Increase revenue, elevate value-based quality outcomes, and improve physician engagement through precise documentation, coding, and process improvement.

Enhance Data Integrity

Increase physician engagement and elevate your clinical documentation with our proven peer-to-peer approach. Contact us today at info@enjoincdi.com.
