

# Outpatient CDI – A Patient-Centered Approach

A best practice Outpatient Clinical Documentation Improvement (CDI) program encompasses several key components to ensure effectiveness and efficiency in capturing accurate clinical documentation.

Shifting case volumes between outpatient (same day surgery), observation, and inpatient as well as patient complexity in the various settings can contribute to changes in case mix and respective revenue streams.

## Explore the Enjoin Advantage

### Hospital Outpatient CDI Best Practice

#### ASSESS

Conduct a comprehensive gap analysis of current documentation, denial data, and operational workflows to assess operational readiness and formulate targeted areas of opportunity for development of a new program or to enhance an existing OP CDI program.

#### DESIGN

Partner to create a detailed timetable and manage established milestones and workflows to develop a client-specific roadmap.

#### IMPLEMENT

Achieve scalability with process development and clinically relevant education for CDS/Coders, hospital outpatient departments, physician clinics, and multi-specialty physician groups including customized training and CDS shadowing for compliance.

#### MONITOR

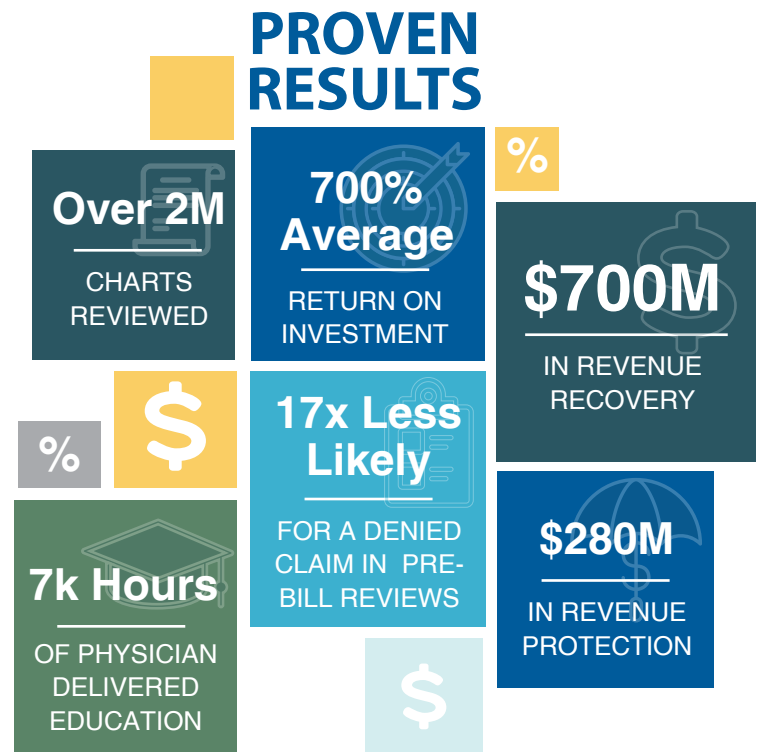

Support a data driven approach with performance monitoring for optimal outcomes and evolving opportunities. Implementing a culture of continuous quality improvement, where feedback loops are established, lessons learned are shared, and processes are refined over time can help measure success and demonstrate program value.

# Outpatient CDI – A Patient-Centered Approach

## Why Enjoin?

- ✓ Mid revenue cycle innovator aligning clinically integrated physician directed services to improve quality of documentation and coding.
- ✓ Physician-led team integrating evidence-based medicine with coding rules and guidelines.
- ✓ Advanced clinical acumen and clinical coding expertise
- ✓ Advanced interactive PBI reporting and dashboards for targeted education and performance metrics
- ✓ Educational resources to support knowledge transfer and CDI program advancement

With Enjoin, clinical complexity becomes clear, improving financial performance, risk adjustment and quality outcomes.

**Physician-led.  
Proactive.  
Deep-rooted in Education.**

EnTrust Enjoin to support your journey for a Best Practice Outpatient CDI program to enhance documentation accuracy, optimize revenue integrity, and ultimately improve patient care outcomes.
