

Quality Measure Training

Elevate your CDI Program

Evolution is the key to long-term sustainability and success. CDI programs must expand beyond CC/MCC capture to include diagnoses that affect patient risk and cohort definitions.

Getting to Know Your Data

The transition of health care reimbursement from fee for service to pay for performance has introduced numerous claims-based quality measures which impact both financial performance and quality profiles.

Analyzing claims-based quality data is a complex task. Understanding the implications of your data will guide enhancements by quality-focused specialists. For example, it's important to know:

- Observed rates for readmission, mortality, complications, and patient safety measures only partially define your performance-based payments.
- PSI 90 affects your score in both the VBP and HAC Reduction Programs.

CDI programs can—and must—broaden in scope to ensure claims data supports accurate value-based outcomes. By focusing on claims-based quality measures, Enjoin takes your program to the next level, ensuring data integrity which is essential to accurate quality profiles and reimbursement.

Consider a post-bill quality focused chart audit for cohort accuracy based on the most recent specification publications to serve as the foundation for quality measure training.

Enjoin Can Help

It's important to understand how documentation links to quality and vice versa. Enjoin helps elevate your clinical documentation through Quality Measure Training.

Program Benefits

- Identify value-based outcomes with performance improvement opportunities
- Pinpoint documentation and coding opportunities to help ensure data integrity – essential to accurate quality profiles and reimbursement
- Receive training on quality measure methodologies and CDI vulnerabilities
- Initiate facility-wide collaboration to improve data integrity through structured breakout sessions

Quality Measure Training

✓ **\$700M**
in revenue recovery

✓ **\$280M**
in revenue protection

✓ **7K hours**
of physician delivered education

✓ **Over 2M**
charts reviewed

✓ **700% average**
return on investment

✓ **17x less likely**
for a denied claim in pre-bill reviews

The Enjoin Quality Boot Camp was exactly what I was looking for! The delivery of the advanced level professional content and extensive knowledge of the Enjoin presenters was industry best practice. With a focus on not only cohort identification but also risk adjustment and learning opportunities for optimizing our reviews, we have decided to bring the Enjoin team in house to conduct a more in-depth quality measure training seminar for our CDS and physician advisor. I highly recommend this Boot Camp!

HIM Director, Integris Health

QMT - Powered by CDocT®

CDocT is a web-based quality and risk adjustment resource tool that helps clients achieve optimal performance across the care continuum. Program modules support CDI programs through the expansion of value-based reimbursement and quality measure initiatives.

Developed by board-certified physicians and CDI experts, CDocT uses a data driven, evidence-based and train-the-trainer approach to educate staff on claims-based quality outcomes. Organizational training utilizes both educational resources and grounded case studies to train about CDI integrity and its effect on value-based outcomes. Timely updates ensure the solution keeps up with how quality measures evolve over time.

Physician-led.

Proactive.

Deep-rooted in Education.

Save time, prioritize your risk adjustment opportunities and elevate your CDI program for value-based care with CDocT.
